

Maryland

NAEP proficiency level and percentile data as well as results from state assessments demonstrate the existence of substantial excellence gaps for Free and Reduced Lunch Eligible students. White students had higher average AP scores than Black students on AP tests and were more likely than Black or Hispanic students to make a “5” on an AP exam or take an AP exam.

According to NAEP proficiency data, the percentage of students at the advanced level increased in Math Grade 4 across subgroups; in Math Grade 8 and Reading Grade 4 for FARM, non-FARM, and white students. White and non-FARM students improved more rapidly than their peers in both Grades in Math as well as Reading Grade 4, with the exception of Farm students in Reading Grade 4. The excellence gap narrowed for Reading Grade 8 for Hispanic and FARM students, who improved where other students’ scores stagnated.

NAEP scale scores at the 90th percentile increased for most subgroups in both Grades in Reading and Math, with major gains by FARM students in Math Grade 4. FARM students either kept pace or narrowed the gap with non-FARM students, while Black students did so in Reading and Hispanic students in Reading Grade 8. The excellence gap expanded for Black students in Math Grade 8 and Hispanic students in Reading Grade 4.

There was a substantial increase in the proportion of students among ethnic and income subgroups reaching the advanced level on state assessments across grade levels in Reading as well as elementary and middle school Math, with white and affluent students increasing their performance more quickly than Black, Hispanic, or lower-income students. There was little change in performance or achievement gaps in high school Math.

On the AP exams, there were increases in the achievement gaps in mean AP scores and the percentage of tests scoring a 5 (weighted and unweighted). There were increases in the gap between white and Black students in the percentage of exams scoring a 5, but a decrease in the gap between white and Hispanic students.

Summary of State Policy as of 2006-2007							
State	Mandate Identify	Mandate Services	Gifted Identified	Identified by Gender	Identified by Ethnicity	GT Funding	GT Funding per Identified

Gaps in the Number of Tests Taken Weighted by Subgroup Enrollment*

*The unit of analysis for AP data is the test, not the student. AP test results are presented as the number of scores received by members of each subgroup, NOT the number of students who received a given score on any exam. These numbers are not equivalent because some students take multiple tests.
